News No.20 dated 12/06/2009

PHASE WAS RAISED TO 6 BY WHO

The flu type A H1N1 spread gradually in to 74 countries. WHO declared raising the phase from 5 to 6 (=pandemic) yesterday evening. It has been 41 years since WHO declared phase 6 the last time for flu type H3N2 (Hong Kong flu/1968-1969/about 1,000,000 people dead in the world). Following is the report updated on 10th June. In the past, we cancelled WBC Japan round in 2003 for SARS (there was no any case in Japan that time but the organizer has decided it for the safety reason). We should not be afraid too much but we should be careful not to spread more. And we are very worry about this influence to our international events.

Rank	Country	Case
------	---------	------

1	USA	13,217
2	MEXICO	5,717
3	CANADA	2,446
4	CHILE	1,694
5	AUSTRALIA	1,224
6	UK	666
7	JAPAN	485
8	SPAIN	331
9	ARGENTINA	235
10	PANAMA	221
11	CHINA	142
