2010 WBC ITALY

It is not the definitive version but we got one sample logo of WBC from Italy. It is using a symbol of the region include Darfo Boario Terme. Below photo was taken by Hiro when he has been in Italy. Unfortunately it was taken in the night without flash

light. Can you see the symbol by the left side of the billboard? We see it on the sample logo above that riding on a bike. So we asked the explanation about it to Giuliano.

Hello Hiro,

The symbol in the photo is one reproduction of the famous “engravings rocks” of Valle Camonica. In the prehistoric period in our valley many people make his graffiti and now our valley is famous in the world for this reason. My idea is inspired by the graffiti of Valle Camonica. Explain the significance of the graffiti is very very difficult. Every draw has a significance (also hieroglyphics or Japanese ideogram). In your photo is the “prayerful” or “the shaman”. We have many symbols. In the '30 the Germans tried the old European root in this rock. Today the graffiti is UNESCO heritage and many students visit the graffiti site in Darfo Boario Terme and Valle Camonica. Over 10.000 students from Italy and Europe every year. Is very important site.

You can have info here:

and many others.

ATTENTION:

The logo I sent you yesterday is one draft; Is not the definitive version. The definitive version is in project.

Hello,
Giuliano.
